

### Moda, trend-setting innovation.

Operating simplicity and maximum customization for a machine that represents the best of the innovative technology developed by Brasilia. Owing to the touch interface, Moda dispenses perfect drinks at just one touch.

### Maior, contemporary tradition.

The solidity of the steel is matched by the reliability of a practical and functional system. Maior encapsulates all the experience of the Brasilia brand and it is the finest expression of a success story and cutting-edge performance.

### Lucia, the style of tradition.

Retro design and force of expression. If you are demanding lovers of coffee culture, Lucia is the machine for you. With lever or automatic, shiny steel and structure designed for functionality.

### Sofia, the true aroma of simplicity.

The ergonomic line and the soft curves of Sofia will win you over immediately. Designed to offer the best service, together with a harmonious and durable look that stands the test of time, Sofia enhances any setting, whether a bar, hotel or restaurant.

## Technical characteristics

#### Rito

→ Available in 2 or 3 groups, version standard or Tall Cup (with retractable cup supports in stainless steel for cups up to 135 mm). New B16 group with static pre-brewing, designed by Brasilia. → **Rito:** automatic standard model with mechanical keypad and LCD 16x2 character display. → **Rito Touch:** automatic model with advanced and customizable user interface. Backlit capacitive keypad with 6 available key colors owing to the RGB LED backlight. LCD TFT 4.3" color touchscreen.

→ **Rito "Bullone Rosso" (Red Bolt):** model equipped with the "Bullone Rosso" system (Red Bolt system), an exclusive technological innovation that ensures great temperature stability. → 2 lever-operated stainless-steel "cold touch" steam wands. → Stainless-steel water wand. → Dosed hot water that is operated by the LCD touchscreen with temperature settable by programming software/menu. → Work area lighted by white LED. → Ergonomic filter-holding grip, tilted by 10 degrees.

#### Moda

→ Super automatic machine that contains cutting-edge solutions in just 60 cm high. → User interface with 10" LCD TFT touchscreen monitor from which to choose your favorite drink in a just few clicks thanks to an attractive and intuitive menu. → Touchscreen technology that offers great variety and simplicity of customization. → Brewing unit with variable chamber for dosing coffee from 7 to 14 g and ensures optimum pressing and brewing conditions. → New fresh milk frothing unit for an incredible variety of both hot and cold drinks. → Stainless-steel steam and water wand. → Dosed hot water that is operated by the LCD touchscreen with temperature settable by programming software/menu. → Start/Stop function available on all selections. → Movable nozzles unit to adapt to any type of cup/glass and ensure the best visual appeal for the brewed drink.

#### Maior

→ Automatic version with multifunction LDC display, programming of doses from control panel and dual control for continuous brewing. → Available in 2 or 3 groups in the standard version or Tall Cup (with retractable cup supports in stainless steel for cups up to 16 cm). → Large-capacity copper boiler with a system of thermosiphon heat exchangers for continuous dispensing of steam. → Hot water chrome wand. → 2 chrome steam wands with anti-scalding protection. → B61 brewing unit with dynamic brewer.

#### Lucia

→ **Lucia with automatic dosage:** electronic machine with programmable dosing, keypad with 6 membrane rectangular buttons for each brewing unit. → **Lucia with lever:** vintage design and lever-operated for people that consider espresso-making a true artistic creation. → Available in 2 or 3 groups. → Espresso group with static brewer. → 2 chrome steam wands with anti-scalding protection. → Hot-water wand and temperature adjustment through a mixer. → Two gauges to monitor the pressure in the boiler and that of the water pump.

#### Sofia

→ **Sofia with automatic dosage:** electronic machine with programmable dosing, keypad with 6 membrane push buttons for each brewing unit. → **Sofia semiautomatic:** version with a single and practical switch with continuous dispensing. → Choice among 1, 2 and 3 groups (1 group available only in the automatic version) depending on your production needs and available space. → Espresso group with static brewer. → 2 chrome steam wands with anti-scalding protection. → Hot-water wand and temperature adjustment through a mixer.

### Rito, innovation reveres quality.

Having coffee is a ritual that the new Brasilia range of espresso machines presides over like no other. Its leading edge design combines appealing aesthetics with practical features, maximum reliability, and brewing solutions that can be adapted to each individual blend: this new line is the ideal solution for all those coffee shops where a quality espresso is truly a ritual.

**Brasilia, a Made in Italy brand that continues to write the history of high quality espresso.**

People change, but their work, when done with care, passion and creativity, remains. It remains in the manufactured products, in the filed patents, in the work of those who use these solutions daily to develop their business. For this reason, now that the Brasilia brand re-joins the top players of the Ho.Re.Ca. market, the first thought goes to those who launched this brand in 1978 and were able to make it an example of “Made in Italy” worldwide, developing patents, technologies, and machines that made the difference. Thanks to Bianchi Industry Spa, the Brasilia brand is back, re-starting from the successes obtained globally and offering a series of state of the art solutions where the best technological tradition meets the future of espresso.

Rito, Moda, Lucia, Sofia, and Maior: these five machines hold the present and the future of those who seek quality in its most innovative expression. Thanks to the union between technology, design, and functionality, the Brasilia range of machines meets the needs of a continuously evolving market. The passion for true Italian espresso is conquering new markets and Brasilia is an ambassador of the Made in Italy quality worldwide.

**Bullone Rosso (Red Bolt), the technological solution to be savored.**

The Bullone Rosso (Red Bolt) system makes Brasilia machines inimitable. From a technical standpoint, the water going to the heat exchanger is heated and passes through the temperature stabilizer. This technology allows the transfer of the aromatic complexity of the coffee blend to the cup and thus the creation of espressos with an unbeatable taste.
